department was ever called upon to determine the status of a member of the supreme court. The decision (Sec. 62, Title 5, Federal Statutes) was easy. The justice could stay with the Army or stay with the court. He couldn't do both. The memorandum hasn't been made public. It probably won't. There's really no need. In Army circles, it is a foregone conclusion that come October, when the supreme court reconvenes, Lieut. Col. Frank Murphy (like members of Congress in the armed forces who were ordered back to legislative duties by President Roosevelt) will be placed on the Army's inactive list.

However, if the justice quit the Army tomorrow, he would already have written a chapter in Supreme Court history. When the court was called in extra-curricular session to hear the habeas corpus pleas of seven of the eight Nazi saboteurs recently convicted, Associate Justice Murphy was the only member who had to absent himself. The decision too much involved the Army.

When the Department of Justice wrote its memorandum in Justice Murphy's case, it was only necessary to rehash one it had written a few weeks before in the case of Third U. S. Circuit Court of Appeals Judge William Clark, of Princeton, N. J., who actually stepped down from his lifetime judgeship to enter the Army.

One of the things the Marines had to be careful of—in this picture—was whether or not the Marines could die like Marines. That is, without hamming it up too thick. When a man's hit, he goes down, and as a rule he seldom flails his arms, twirls in mid-air, crosses himself, and kisses his sweetheart's picture before he passes on. General Denzio, who he passes on, in more than one war, and who would need an extra shirt front to provide space for all his medals, if he chose to wear them, gives Hollywood the okay on this one.

Incidentally, like the Wake Marines who fought the first action of the war after Pearl Harbor for the U. S., the Marines were also first in the First World War. Back in 1917 a detail of 15 Marines, on orders of President Wilson, seized the German warship Cormoran, which had interned at Guam several months previously. En route to the ship they were compelled to fire across the bow of a cutter carrying German naval officers, to bring about the surrender of those men. It preceded by six months the next shot fired by Americans—this time in France—in World War No. 1.

Though the official day-by-day log is faithfully adhered to in "Wake Island," the names of the chief characters are fictional. For instance, the counterpart of Major James Patrick Devereaux, who was in command at Wake, is the actor Brian Donlevy, who, as Major Caton, does a cheery, bang-up job.

By JACK STINNETT

Washington—He's the Army's only no-dollar-a-year man. If you went back through Army annals to the days when men fought for glory or convictions and not for booty or pay, you might find his equal. But if you searched the annals of the U. S. supreme court, you would never find a justice who took a vacation to join the armed forces as he did.

When he stepped down from the supreme court bench for the summer adjournment, he announced that he would return to the Army. He was a captain in the 85th division in World War I. He said he had wanted to get back into uniform every since December 7. He said he hoped to continue in the armed forces "for the duration."

This immediately raised a question: Would he resign from the court? No. He would just take leave. Whether he could was a legal question which Justice Murphy has recognized immediately or he let it be known soon after that he might only stay with the army until the court meets again in the fall.

The Department of Justice (in which Murphy was once Attorney General) has issued a memorandum defining the justice's position as probably the only time that the

ton is a biography of a peace-time American industry. It includes the manufacturing of rayon and Nylon stockings. This book tells of the development of blasting powder which made possible new mining methods, and build railroads faster. And the development of dynamite, which eventually replaced most powers in peace-time construction. This new history of the DuPont is eminently worth reading.
